

Creating a Production Template

Last Modified on 02/18/2020 10:51 am MST

On the left navigation menu choose Production Processing, then click Process Templates

In the upper left-hand corner, click the New button

Enter Template Name, choose Producer Option, Process By, and the Service Type

A screenshot of a form for creating a production template. The form has four fields: 'Template Name' with the value 'Raw Biomass to Dired Biomass', 'Producer Option' with the value 'Customer', 'Process By' with the value 'Quantity available', and 'Service Type' with the value 'Raw Biomass to Dried Biomass'. The 'Service Type' field has a small 'x' icon next to it, indicating it can be removed or reset.

The Service Type can be added directly from this drop down. The Service

Type will determine the charge for the particular Processing Service.

servicetype

Service Name:	Raw Biomass to Dried Biomass	Per Unit Fee:	\$1,500.00
Flat Fee:	\$0.00	Split Retained:	100.00%
Product Processed:	Raw Biomass by lb	Split Returned:	0.00%

Once this information is entered, choose the Packages and the steps to create the packages

- In the Packages pane in the template window, click the green plus button
- Add the stage and the inventory product you plan to use to create the new finished good product

Template Name: Raw Biomass to Dired Biomass
